KUWAIT: Due to the successful record of the four previous conferences, the New Mowasat Hospital launched the fifth digestive endoscopy symposium under the auspices of KUWAIT: Due to the successful record of the four previous conferences, the New Mowasat Hospital launched the fifth digestive endoscopy symposium under the auspices of the Ministry of Health. Dr. Al-Qushayri, an expert in the field, attended the symposium. The Board of Directors of the Endoscopy Organization, the European Society of Gastrointestinal Endoscopy and a group of international digestive tract specialists. The conference is chaired by Dr. Ahmed Al-Khader, Consultant and Clinical Director of Digestive Disease Endoscopy at New Mowasat Hospital.

KUWAIT: The conference focuses on hepatology diseases by presenting a quantum leap and use of the new generation of treatments for liver cancer - ‘colon capsule’. We believe that capsule endoscopy is a reality. This year, we present a new conference on new obesity endoscopy meet attracts top digestive tract experts

MOWASAT HOSPITAL LAUNCHES 5TH SYMPOSIUM

KUWAIT: National Bank of Kuwait (NBK) announced the winners of its largest campaigns this year during the Mega Draw event that took place at the Grand Avenue in the As-safir Hotel on Monday, June 22nd, 2014.

Salah Al-Fulaij, CEO of NBK and Emad Al-Ablani, NBK’s Head of Human Resources, awarded the first prize of KD 250,000 to Al-Jawhara quarterly prize winner, Hayat Al-Roi, Mohammad Al-Kaneem, winner of the prestigious, customized Rolls-Royce Phantom, the grand prize of NBK’s Summer Campaign.

The event was attended by Salah Al-Fulaij, CEO of NBK Capital; Emad Al-Ablani, NBK’s Head of Human Resources; Ahmad Al-Khader, NBK’s Deputy Head of Consumer Banking Group and other NBK officials. "NBK is keen to always exceed its customers’ expectations," said Al-Fulaij. "We want our account holders to benefit from the Mega Draw event. Winning gifts and prizes gives our customers an opportunity to participate and enjoy the draw. The NBK rolls out Phantom and Al-Jawhara quarter draws for our customers’欢乐 and is a success for this year’s summer campaign."

The event was broadcasted and covered live on NBK’s Official Facebook and Twitter social networks. We hope that this summer campaign will continue throughout the year. During this summer, NBK launched its Summer Campaign offering NBK cardholders a chance to win and build a prestigious Rolls-Royce Phantom, being the first bank in Kuwait to give away a Rolls-Royce as well as a travel package to the renowned home of Rolls-Royce Motor Cars in Goodwood, England, to enjoy a unique experience by designing their own bespoke Rolls-Royce Phantom.

The travel package includes two round air tickets, accommodation at a 5 star hotel in central London, transfer service to and from the airport and a visit to the factory itself to design their own bespoke Rolls-Royce Phantom - tailor-made to their personal preferences.

Dr. Al-Mohammed, CEO of the Endoscopy Organization, stressed that the conference has a number of participating companies in addition to the Open University, in addition to exchanging their practical experiences. "The conference has achieved clear success, which garnered it prominent status in the international scene, as it witnessed the involvement of experts in the field of digestive endoscopy. Moreover, the success of the conference confirmed New Mowasat Hospital’s company and capability in taking on this responsibility, he added.

Quoting Al-Jawhara quarterly prize winner, Hayat Al-Roi, said: "This international symposium which is being held for the first time in Kuwait will have a significant impact in creating a quantum leap and of the new generation of endoscopies in the early detection, and treatment of tumours as a means to diagnose with major surgery," Dr. Al-Taweel explained.

"The conference will be attended by seven of the top consultants in digestive diseases, Prof. Shazia Ahmad;ish, a specialist in medical genetics, and Prof. Islam Al-Salam;ish, a specialist in digestive endoscopies," he added. "This conference will be held on endoscopy ultrasonic examination that reveals many diseases and performs different interventions that ordinary endoscopes fail to reach."

Dr. Al-Taweel added that among the consultants who were invited is Prof. Nejed Senseen, a specialist in gastroenterology, and Prof. Nidal Al-Roi, a specialist in gastroenterology. Al-Roi has international experience in this area and will contribute to the installation of a metal tube for patients with pancreatic cancer. Prof. Franco Muzi of France spoke about the problems of visual reformation operations. "The invitation is open to all doctors in the digestive system to attend the conference as well as to pediatricians, surgeons, oncologists and general practitioners at various hospitals and clinics, as well as members of the nursing staff, pointing out that the presence of these groups will enrich their experience and widen their knowledge, where the sessions will focus on the most significant developments in the world of digestive system diseases and the time needed for patients to use endoscopies either for examination or treatment," he explained.
